

ALICE L H WURTH LEED AP ID+C SCHWERD CONSULTING

ABOUT

With over 7 years of LEED Consulting and project coordination experience, Alice brings a passion for green building, sustainability and renewable energy to Schwerd Consulting. She has been able to use that passion to seamlessly transition from a career in interior design to coordinating large scale, multi-site solar projects with several different disciplines. Alice works with our clients, civil, electrical and structural engineers, contractors, and permitting authorities to synchronize everyone in order to maintain an efficient project workflow. She not only understands the environmental and financial benefits associated with solar installations, but she has the experience in getting the county/town approvals and permits needed to get the job done. Not to mention the technical knowledge in preparing PV layout designs and utilizing industry accepted software for energy production estimates

Working with Schwerd Consulting has been a perfect fit for Alice, whose ideas and principles align with the company's core values. She is committed to fostering a stress-free working relationship with all of the counterparts involved in a single project, while still focusing on keeping aggressive timelines and project demands. Positive relationships are what build both a successful project, and business.

EDUCATION

The Art Institute of California - Orange County:
2007, Bachelor of Science in Interior Design
