William D. Rogove

About

With over 30 years' experience successfully directing operations for multimillion-dollar, solar renewable, commercial and utility projects; William's key to success, is through communications and ensuring all parties understand their area of responsibility. This allows ownership and the ability to hold team members accountable. As part of the Schwerd Consulting team, Bill is involved with both project development and construction and project management type activities for solar projects.

At SunEdison, William ultimately was responsible for coordinating and facilitating all Operational aspects in the Utility arena for the Continental US. He developed over 500 MW and had an additional 3.2 GW in design and construction at the time of his departure.

Prior to employment at SunEdison, William was deeply involved in Industrial, Commercial and Residential Construction. Mr. Rogove is a licensed building inspector and building sub-code official in New Jersey, and is a past member of the zoning board for Freehold Township, NJ. He served as Trustee of New Jersey Shore Builders for 9 years; one of his duties was sitting on the State Codes Committee where he regularly interfaced with the DCA and other State leaders of the Construction Industry.
